

Coated Automotive Glass

Enjoy the energy efficient and comfortable lifestyle brought by Fuyao coated glass!

In Summer * IR Coated Reflective

- Coat the inner surface of the glass with multi-layer nanoscale silver film with magnetron sputtering technology to reflect more than 65% of infrared rays and effectively insulate from the heat.
- Energy savings from reduced need for air conditioning.
- Better anti-glare function, making night travel safer.

In Winter * Coated Heated

- The leading coating process heats the glass up in winter to rapidly defrost and de-ice.
